SKILLS

- Web Development[Java| Python| JavaScript| HTML & CSS
- Tools: Visual Studio Code | IntelliJ |GitHub & Git |Google Cloud Platform|MS Office|Oracle Payroll Software
- Security Tools: Hydra| BeEF (Browser Exploitation Framework)|WireShark| Snort

CERTIFICATIONS

- CompTIA A+ obtained Feb 22
- Google IT Support Certificate obtained October 2021

EDUCATION AND TRAINING

Seattle University | Seattle, WA August 2025 - Current
Master's of Data Science

York University | Toronto, ON September 2023 - August 2025
Bachelor of Science in Computer Science | **Cumulative GPA:** 3.0/4.0 Relevant
coursework in Calculus, Advanced Data Structures, Computer Security, Database System Design, Python, and Java Programming

Brock University | St. Catharines, ON September 2022 - August 2023
Bachelor of Science in Computer Science | **Cumulative GPA:** 3.0/4.0
Relevant coursework in Data Structures and Abstraction, Applied Linear Algebra, and Java programming

University of Windsor | Windsor, ON|(Graduated) January 2015 – May 2019
Bachelor of Commerce in Accounting, Minor in Applied Information Technology | **Cumulative GPA:** 3.3/4.0
Relevant coursework in Computer Concepts, Business Data Analysis, Marketing, Cyber Ethics, and Advanced Website Design using JavaScript.

TECHNICAL PROJECTS

Umoja Community Project(Robot building Project) September 2024 - Date

- Prepared high school students for robotics competitions by conducting practice runs, ensuring compliance with rules, and guiding presentation skills for judging panels.
- Supervised and trained students in the safe use of tools and equipment, such as soldering irons,3D printers, and CNC machines.
- Provided technical guidance on robotics fundamentals, including mechanics, electronics, programming, and control systems, fostering hands-on learning for students.

Agile Waterfall Fusion Guessing Web App Game (HTML, JavaScript, CSS, Node.js) October 2023

- Developed a web application that engaged users in an interactive guessing game that efficiently compared user input with server-generated numbers until a correct guess was made.
- Leveraged HTML, JavaScript, CSS, and Node.js to design and implement the user-friendly front-end and server-side components of the web application, delivering an enjoyable user experience.

Flower-Garden Design - Brock University (Java, Turtle Graphics) October 2022

- Created a Java program using turtle graphics to create a garden of flowers, with the number of petals determined by user input.
- Incorporated the usage of angles(in radians) and a while loop to draw the shapes of petals repeatedly until a garden of 36 flowers was created.

Soccer Education Website - University of Windsor (HTML, JavaScript, CSS) April 2017

- Designed and developed an educational website focusing on the sport of soccer while taking an Advanced Website Design course.
- Utilized JavaScript, HTML, and CSS to create a dynamic website featuring the main page, connected to multiple sub-pages, and a navigation bar for an easy user navigation experience.
- Implemented responsive web design principles to ensure website adaptability across various devices.

WORK EXPERIENCE

York University(Mechanical Eng Dept.) - Toronto, ON
Research Assistant |Nov 2024- May 2025

- Performed tensile testing on a variety of materials to evaluate mechanical properties, including ultimate strength, yield strength, and elongation.
- Prepared and documented test specimens in accordance with ASTM and ISO standards, ensuring accurate and repeatable results.
- Analyzed experimental data using statistical and software tools to generate detailed technical reports.

Walker Industries - Niagara-on-the-Lake, ON
Payroll Administrator |Aug 2022 - Sept 2023

- Managed weekly payroll for 300 employees using Oracle Payroll Software, ensuring accuracy and on-time processing.
- Streamlined onboarding workflows by integrating payroll setup into new-hire orientation.
- Maintained compliance with company and government payroll policies, regulations, and reporting requirements.

Canadian Bureau for International Education | Ottawa
Financial Administrator |Mar 2022 - May 2022

- Processed tuition payments and monthly living allowances to institutions and students with strict attention to detail.
- Audited payment batches prepared by program coordinators to verify accuracy before release..
- Performed account reconciliations and investigated discrepancies, resolving issues to maintain balanced ledgers.

Sutherland Global Services| Ottawa, ON
Technical Support Representative |Mar 2017 - Dec 2017

- Answered high-volume inbound calls, providing the first line of technical support to customers.
- Diagnosed and resolved hardware, software, and connectivity issues for customers.
- De-escalated cases of customer dissatisfaction by identifying root causes and offering solutions.
- Verified insurance policy details and determined product/service eligibility for coverage.

University of Windsor | Windsor, ON
Teaching Assistant - Accounting
01/2017 - 09/2018

- Performed tasks such as grading assignments, quizzes, and finals.
- Reviewed material taught in class with individual students having challenges and ensured the understanding of the concepts being taught.
- Proctored tests and exams and assisted the professor with the compilation of grades.
